for sailing

Relax and enjoy the power of Code 0 sailing - Effortlessly

CX electric

CXe 25 *CXe 45*

ELECTRIC CODE 0 FURLING SYSTEM

Having a furling Code 0 sail set on the bowsprit will deliver the joy that powerful and efficient sailing provides. Combined with a furling jib you will have the ultimate headsail wardrobe from broad reaching to beating upwind, all without leaving the cockpit. The addition of push button convenience guarantees an effortless sailing experience.

POWERED BY
SEL Bus

(Through Deck)

CXe 25 OD
CXe 45 OD

(On Deck)

“The CXe 45 is exceptionally easy to handle, partly because of the high speed when furling the sail. It takes effortless sail handling in light air to a whole new level.”

*Magnus Rassy,
CEO and owner of Hallberg-Rassy Varvs AB*

On Deck or Through Deck

CXe can be integrated into the bow or bowsprit with a through-deck installation. This permanent installation is always available, ready for the furled sail to be connected.

The on-deck installation of CXe requires no modification of the deck or bowsprit. Just attach it to a pad-eye and connect the cable on deck or in the anchor locker.

Model	Parts included	Art. No
CXe 25 OD	Drive unit	545-455-18
CXe 25 OD	Drive unit & halyard swivel	545-455-19

CXe 45 TD	Drive unit & halyard swivel	545-455-31

Captive pin with spring loaded clutch. Operates with one hand.

On the technical side

Like other electric functions from Seldén, CXe runs on SEL-Bus and a Power Supply Unit (PSU) converting 12V or 24V to 42V. SEL-Bus is a can-bus system with software that combines intelligence and power on board to sense and adapt loads for maximum efficiency and safety. Once you have installed SEL-Bus you can connect additional functions and run them all on the same PSU. 42V allows for smaller power cables (6 mm²) and a compact brushless motor.

Max working load, kN	CXe 25: 25	CXe 45: 45
Max suggested sail area, m ²	CXe 25: 115	CXe 45: 200
AT-cable, diameter, mm	CXe 25: 13	CXe 45: 15
Operation	2-speed	
Rev. per minute (slow/high speed)	220/500	
Voltage, V	42	
Current consumption, Ah, Nominal, 12V	0,13 Ah (Nominal 50 A, 10 seconds)	
Current consumption, Ah, Nominal, 24V	0,07 Ah (Nominal 25 A, 10 seconds)	
Power, W	1000	
Motor	42V, brushless

Seldén AT-Cables (Anti-Torsion)

The more torsional rigid AT-cable, the quicker and safer the sail will furl. Seldén provide the most rigid cable on the market, three times more rigid than the second best.

Model	Art. No.	Length, mm	Dimension, Ø mm

Code 0 halyard with 2:1 purchase

To boost the performance when using a Code 0, the halyard load must be higher than what normal halyard boxes and stoppers can handle. Therefore, a 2:1 purchase needs to be arranged by fixing the dead end of the halyard in the mast and letting it run through a block attached to the halyard swivel. Position on the mast must be specified by Seldén. In most cases Code 0 sails need to be hoisted lower than gennakers and spinnakers.

Block for 2:1 purchase

The Seldén Group is the world's leading manufacturer of mast and rigging systems in carbon and aluminium for dinghies, keelboats and yachts.

Our well known brands are Seldén and Furlex.

The worldwide success of Furlex has enabled us to build a network of over 750 authorised dealers covering the world's marine markets. So wherever you sail, you can be sure of fast access to our service, spare parts and know-how.

SELDÉN and FURLEX are registered trademarks of Seldén Mast AB.
